1/4" Seam Allowance Check

Even if you use a 1/4" foot, your seam allowance may not be accurate!

To check if your seam is accurate, cut three 1 1/2" x 3" pieces from scrap fabric.

Sew the pieces together along the 3" side, using what you believe is a 1/4" seam.

Press away from the center piece.

Measure.

The center piece should be exactly 1" wide.

If, when you measure, the center is less than 1", your seam allowance is too large.
If it’s more than 1”, your seam allowance is too small.

Refer to your machine owner’s manual for instructions on changing your needle position.

Repeat the test until your center strip measures exactly 1”.

Please read through entire pattern before beginning.

Fabric swatches are not to scale, they are for identification purposes only.
