This quilt is super easy, and fun to construct. Check out my book, "Color Strata, Seam, Cut & Sew" for more detailed information and other sample projects. Also, videos online at [www.RobAppell.com](http://www.RobAppell.com)

The image to the left is the sample layout for all the strips and strata used in my project, but do as you like, the possibilities are endless.

### Make your Strata

1. Make strips of each fabric that measure 2 1/2" x 44".
2. Cut your strips to 22"
3. Take two of the 22" strips and split each one of them into 22" x 1" and 22" x 1 1/2" so that you now have two each that measure 2 1/2", 1 1/2" and 1"
4. Make your sets, keep your color order the same but make several sets of strata. First make strata using all the same sizes, then for the next strata sets, mix the sizes of strips, but keep the color order the same.

5. Cut your strata strips so that you have at least two at 3", three at 2 1/2" and five at 1 1/2" wide.
6. Mix your strata parts into long strips using the same widths, I let the same colors touch as I worked through the many strata sets per row. Then sew the sets into row.

### Pop Fabrics

Choosing the green family from this line, I cut two strips per color that measured 44" x 2 1/2" and 44" x 1 1/2". Then layout the greens in a random width order, but flowing from the dark green at the edges to the yellow in the middle.

**The key is to keep it looking random!**
