1/4" Seam Allowance Check

To check if your seam is accurate, cut three 1 1/2" x 3" pieces from scrap fabric.

Sew the pieces together along the 3" side, using what you believe is a 1/4" seam.

Press away from the center piece.

Measure.

The center piece should be exactly 1" wide.

If, when you measure, the center is less than 1", your seam allowance is too large. You need to move the needle to the right.

If it's more than 1", your seam allowance is too small and you need to move the needle to the left.

Consult your machine's owner's manual for instructions on moving your needle position.

Repeat this check until your center strip measures correctly.
